👤 Summary

Self-taught full-stack developer focused on building production-quality web applications with React, Next.js, and TypeScript. I learn by shipping real projects rather than tutorials — with an eye for clean UI, smooth motion, and considered interface details. Currently expanding into backend development while building and deploying complete, polished products.

🎓 Education

Intermediate in Computer Science (ICS)

01/2026 – Present | **Karachi, Pakistan**

Govt. National College

Self-directed study in full-stack web development alongside coursework

🧠 Skills

Frontend — Proficient

React, Next.js, TypeScript, JavaScript (ES6+),
HTML5, CSS3, Tailwind CSS

Backend & Tools — Competent

Node.js, Git, GitHub, REST APIs

🌐 Languages

• Urdu — Native

• English — Fluent

📁 Projects

Mobile-Comparison-App, Phone Spec-Comparison App

05/2026 – 06/2026

Built a phone spec-comparison web app using React and Vite, featuring a searchable catalog with filter pills, a compare tray for side-by-side specs on up to 3 phones, and an image lightbox with color switching.

SHOP.CO, Fashion E-commerce Storefront

11/2025 – 12/2025

Built a full fashion storefront frontend with product browsing, cart flow, and responsive layouts using React and Vite. Deployed live and open-sourced on GitHub. Live: shopco-project00.netlify.app 🔗

LMS-mockup, SMIT Student Portal – Profile Page

03/2026 – 04/2026

Designed and built a profile page for the SMIT student portal, matching the platform's existing theme and UI patterns. Started with a mockup before implementation to ensure visual consistency with the existing design system. Live: <https://smit-portal-mockup.vercel.app/> 🔗
