👤 Summary

Self-taught full-stack developer focused on building production-quality web applications with React, Next.js, and TypeScript. I learn by shipping real projects rather than tutorials — with an eye for clean UI, smooth motion, and considered interface details. Currently expanding into backend development while building and deploying complete, polished products.

🎓 Education

Intermediate in Computer Science (ICS)

01/2026 – Present | Karachi, Pakistan

Govt. National College

Self-directed study in full-stack web development alongside coursework

🧠 Skills

Frontend — Proficient

React, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS

Backend & Tools — Competent

Node.js, Git, GitHub, REST APIs

📁 Projects

Amazon Clone, E-commerce Product Browsing Clone

05/2026 – 06/2026

Built a front-end clone of Amazon's e-commerce interface using HTML, CSS, and JavaScript, replicating product browsing, layout, and core UI patterns to strengthen vanilla JS fundamentals. Live: amazon-clone0000.netlify.app 🔗

SHOP.CO, Fashion E-commerce Storefront

11/2025 – 12/2025

Built a full fashion storefront frontend with product browsing, cart flow, and responsive layouts using React and Vite. Deployed live and open-sourced on GitHub. Live: shopco-project00.netlify.app 🔗

Furniro, Furniture E-commerce Storefront

03/2026 – 04/2026

Built a furniture e-commerce storefront using React, featuring product listings and responsive layouts to practice component-based UI architecture. Live: furniro00.netlify.app 🔗
